- **Overview**
- **Issue**
- **Impact**
- **Resolution**

Overview

(Percent Complete as of 17 Dec 03)

Issues, Impact and Resolution

- Issue: AMS was not reviewing error logs or DBCCs prior to leaving sites
- Impact: Some of the sites that were upgraded went down after AMS departed
- Resolution: Ensure AMS reviews and corrects errors prior to leaving the site

- Issue: Sybase logs were moved to another drive during the upgrade
- Impact: Defeats uniformity across Air Force
- Resolution: Restore log pointers to location prior to upgrade

- Issue: Sybase Errors
- Impact: Cannot write security auditing to event log
- Resolution: Ensure Sybase 11 is completely uninstalled

- Issue: Failed to load unicode conversion DLL libntlog.dll
- Impact: Foreign character sets not utilized
- Resolution: None - ignore

U.S. AIR FORCE

- Issue: DBCC error #12909
- Impact: Bits are incorrectly set when databases are migrated to Sybase 12
- Resolution: Run checkalloc against all databases to repair

- Issue: DBCC Error #2540
- Impact: None
- Resolution: Run DBCC in single user mode
